

Comlight Radio Commissioning Dongle

Comlight Radio Commissioning Dongle is a tool for local commissioning of Comlight systems. The device communicates with the Comlight units using radio communication, controlled by a PC application with Comlight Commissioning software. The device suits customers that do not want or need a connected Comlight installation.

TECHNICAL DATA

Input voltage	USB +5V
Connecting wires	USB
RF Communication	
Frequency	868.35 MHz
Output power	≤13.9 dBm
Operating temp. range	-30 to +60 °C
Product is CE marked	
To be used with Eagle Eye Commissioning Client Software
